Natural Burial Association

To the Natural Burial Association,

As our urban centres become more and more populated and congested, natural burial grounds in or near cities will provide hundreds, and eventually thousands, of public green acres for our native trees and flowers, and habitats for our birds and butterflies.

I support the concept of natural burial, and would like to express my interest in being buried in an environmentally friendly way. While there are currently no natural burial grounds in Ontario, I would like my death to become an act of conservation when the opportunity becomes available.

My intention is to be buried naturally, and I have let my family and executors know my wishes.
Once the Natural Burial Association has secured a cemetery in the Greater Toronto Area, I intend to complete the necessary paperwork and pay a deposit on the burial plot/s.

People who have loved nature can rest in nature. And those who have fought to help save the earth's health can know that their burials are helping to preserve and create an ecological oasis. All will know that they will be resting in a place of beauty that brings peace to their friends and family, and joy to all visitors, of all species.

The Natural Burial Association has incurred costs to educate consumers about the concept, including the development of materials and the search for suitable land. We would gratefully receive any financial help.

Contributions over $100 are tax deductible.
